

EARTHQUAKE RISK IN THE NEW MADRID REGION

Uncertainty still exists after 200 years

Wednesday, January 18th, 11 AM EST / 10AM CST

The year 2012 marks the bicentennial of two large New Madrid earthquake events in 1812. On this occasion, Willis Re's Catastrophe Management Services will offer a 75-minute web presentation including speakers from each of the vendor modeling companies (AIR, EQECAT, and RMS). In this webinar, speakers will present model's view of earthquake risk in the New Madrid region and share their thoughts on the possible impact of USGS' 2013 National Seismic Hazard Map updates.

RSVP REQUIRED
